

It's amazing what you miss when suddenly it's not there any more – in this case it's noise !

By simply fitting a Mongoose Q-Mat Sound-Shield sound deadening kit, you will immediately notice how noisy your vehicle was before – and how quiet it is now.

The **Q-Mat** Sound-Shield material is an elastomeric butyl and aluminium constrained-layer vibration damper just a few millimeters thick. Being a multi-layer composite, it not only reduces noise and vibration but can also isolate the heat from outside the car.

Closing your car door will sound like a luxury limousine with that satisfying 'thump'.

The **Q-Mat** Sound-Shield is easily cut and moulded to all the variety of shapes inside your vehicle and self adheres to clean sheet metal and other hard surfaces.

Our website contains useful information with guides to installation for the various areas to which Q-Mat can be fitted – and not restricted to vehicles, such as home heat pumps, under wooden stairs or anywhere noise and vibration is generated.

Fit **Q-Mat** to get the biggest difference in how your car feels and sounds. You won't believe your ears !

Before

After

Easy D.I.Y.

Drive it hard ! Drive it loud !

Until you have heard **db Drive**, don't buy anything else. Just one listen will convince you that these are musically the best audio products you have heard.

db Drive, direct from the USA, offers a full range of car stereo speakers, sub-woofers, amplifiers and cable kits for every budget, desired volume and those with a discerning ear !

Take a moment and listen to **db Drive**.....it's what the product was designed to do, reproduce music the way it was meant to be heard !

Keep your passengers entertained for hours with the Mongoose Q Series of DVD/CD players. The sound can be played either through their own built-in speakers (depending on model), your car FM stereo, or if you want a bit of peace and quiet, through wired or wireless headphones.* If you want DVD movies in the front, then consider one of our double DIN multi media systems. They can all be linked together to show the same movie over all screens – or send from the front or, as the driver, you listen to the radio.

Q500 CLIP-ON TO HEADREST DVD

Clip-on (to headrests) 9.00" DVD Player – sold individually

These have to be the most practical DVD accessory that you can buy and one that your seat passengers will really appreciate. The headrest simply mounts onto your existing headrest supports. Your seats don't have to be taken apart to fit them and almost no wiring involved - just a power connection into the armrest. AV connections available. The player has its own built-in DVD/CD/games player and features a 9" LCD screen, speakers, remote control and games controller (sample games disc included).

Available in grey, beige or black.
Features similar to Q415/Q490

What makes the Q500 a great choice is that you can simply unclip them and take them out to use in a different vehicle - it's really a one time purchase !

Q415 – Q490 HEADREST DVD

Rear seat passengers can now watch their own movie from DVD, SD card or USB memory sticks. Play their own games or even watch what is on the other screen.

FEATURES:

- Q415 – 7" screen
- Q490 - 9" screen – ADR Approved
- Soft padded vinyl headrest with leather-grain finish
- Built-in DVD / Games player in each headrest
- Built-in dual speakers
- FM output to play the sound through your car stereo
- Remote control & Games controller with games sampler CD
- IR (infrared) output for optional wireless headphones
- AV input and output - SD & USB in/out
- Mini headphone output socket
- Colours: Q415 – black. Q490 – black, beige, grey & dark grey
- IR wireless headphones – optional
