

SECURITY

M20 - M20S - M24

A great choice when you just want a simple to use alarm without sacrificing features.

M20

The M20 is a feature packed alarm system including an engine immobiliser, offering protection against break in and theft of and from your vehicle. This alarm system is wired to the bonnet boot and doors and is supplied with an electronic shock sensor.

Supplied with two 2 button waterproof rolling code remotes, the M20 can be connected to a vehicles central locking as it contains relays to operate virtually any existing central locking system (some vehicles may require additional parts).

To provide greater security, the M20 will re-arm, re-immobilise and relock the doors (if connected) 30 seconds after it was disarmed but a door not yet opened.

M20S

The M20S has the same features as the M20 but has the added security of a battery back-up siren – just in case someone tries to disconnect your car battery !

M24

The M24 is a 24 volt version of the M20 and is suitable for any 24 volt vehicle – large or small.

M30

The M30 is a fully featured affordable alarm and engine immobiliser system that offers protection against break in and theft of and from the vehicle.

Supplied with two 4 button rolling code remotes, the M30 can be connected to a vehicles central locking as it contains relays to operate virtually any existing central locking system (some vehicles may require additional parts).
