

MPF-S – Front Parking Sensors

Can't see over the front of your vehicle or judge the distance when parking nose into a wall ?

As you approach a wall whilst parking, just depress the foot brake to activate the sensors. The sensors switch off automatically 10 seconds after releasing the brake pedal.

MPFT – Front Parking Sensors for TOYOTA

This ingenious device reads the speed of your car so that the sensors only operate at speeds between 1 and 15kph. Toyota cars only.

MPR-S – Reversing / Parking Sensors

- At approx' 2 metre the buzzer starts to sound slowly
- As you get closer the buzzer sounds faster
- At approx' 0.50 metre the buzzer sounds constantly – stop !

MPR-SD – with Distance Display

Shows left or right side detections as well as distance to object and also sounds a warning.

MPR – Reversing / Parking Sensors

Similar to the models above but with 25mm sensor heads – more suited to SUV or larger vehicles

MPR-D – with Distance Display

Shows distance to detected object

MRR – Rubber Reversing / Parking Sensors

Based on our MPR-S, the MRR includes rubber sensor heads making them suitable for mounting in metal bumpers.

MRSV – Reverse Camera Input and Parking Sensors

Link your reversing camera into this reversing/parking sensor kit so your monitor shows both camera and sensor detections.
